

## **FUNCTIONAL CONSULTANT**

### **Job Description:**

We are looking for a talented and highly motivated results-oriented individual with performance management (CPM\* or FPM) experience to be a part of our consulting team. We need a high-quality performer who will proactively use his/her analytical thinking to find the best solution possible.

The candidate will be committed to excellence and will need to be extremely creative, play well with others and be a formidable communicator.

\*CPM (Corporate Performance Management) description: Set of tools & processes to help Finance leverage their knowledge, by helping them plan & control the Business key figures and performance indicators thus allowing them to play a key role in providing insight and guidance in times of uncertainty.

In short, you will be building budgeting, planning, consolidation, statutory/management reporting solutions.

Take a gander at [www.tagetik.com](http://www.tagetik.com), this is the software platform we're implementing throughout the world as a Platinum Reseller.

### **What you will be doing:**

Aside from having fun and travelling the world (either virtually, or in person) the Consultant role will assist in the best practice implementations of various CPM/FPM applications.

This will typically involve a minor part of SQL, a part of application customization, a part of reporting, a part of thinking in a multidimensional data structures and a big part of interacting with clients all over the world and getting first-hand knowledge of how each industry works.

### **What's required of you:**

- Finance/accounting/financial management systems and business process knowledge including some of the following: budgeting, forecasting, consolidation, financial reporting, internal reporting, management dashboards and statutory reporting.
- Average – advanced SQL knowledge is required
- It is preferred that the candidate will have hands on experience with a CPM/FPM/BI platform; either as a consultant or a long-time power user / administrator.
- Strong business and technical acumen is a must.
- Willingness to travel up to 30% of the time.
- A work schedule to accommodate clients' time zones (US).
- Impeccable English skills.

**Bonus points for:**

- Any secondary language is a plus.
- Having been a consultant on larger scale projects is a plus
- 3+ years of experience working with CPM/FPM/BI solutions is a plus.
- Average financial knowledge is required. Audit experience or advanced financial understanding.
