

TECHNICAL CONSULTANT

Job Description:

We are looking for a talented and highly motivated results-oriented individual with performance management (CPM* or FPM) experience to be a part of our consulting team. We need a high-quality performer who will proactively use his/her analytical thinking to find the best solution possible.

The candidate will be committed to excellence and will need to be extremely creative, play well with others and be a formidable communicator.

*CPM (Corporate Performance Management) description:

In short, you will be building budgeting, planning, consolidation, statutory/management reporting solutions.

Take a gander at, this is the software platform we're implementing throughout the world.

What you will be doing:

Aside from having fun and travelling the world (either virtually, or in person) the Consultant role will assist in the best practice implementations of various CPM/FPM applications.

This will typically involve a minor part of SQL, a part of application customization, a part of reporting, a part of thinking in a multidimensional structures (OLAP) and a big part of interacting with clients all over the world and getting first-hand knowledge of how each industry works.

Basic tasks on this role will be:

- Setup and maintenance of Windows Servers (Server Applications, Wildfly)
- Setup and maintenance of Relational DB 's (Oracle, SQL Server, PostgreSQL)
- Basic configuration of firewalls (ports, rules)
- Development of processing data programs thru product configuration and SQL
- Setup, Configuration and Maintenance of VM 's using HyperView and/or VMWare
- Administration of Cloud environments (AWS, MS Azure). Setup & support of virtual servers.

What's required of you:

- Knowledge and total autonomy in the usage of internet and MS Office tools
- Average – advanced SQL knowledge is required. Knowledge on Relational DBs (SAP Hana, Oracle, MS SQL Server, PostgreSQL, MS Access), Multidimensional (Cognos, Essbase), SQL, VBA
- Basic – Average Knowledge of ETL Tools (Extraction, Transformation and Loading)
- Multidimensional (OLAP) understanding / experience is a plus

- Strong technical acumen is a must.
- Willingness to travel (when possible) up to 30% of the time. Europe & Latin America.
- A work schedule to accommodate clients' time zones (North America, South America, Europe).
- Impeccable English & Spanish skills.
- It is preferred that the candidate will have hands on experience with a CPM/FPM/BI platform; either as a consultant or a long-time power user / administrator. (Finance/accounting/financial management systems and business process knowledge including some of the following: budgeting, forecasting, consolidation, financial reporting, internal reporting, management dashboards and statutory reporting)
- Soft skills: Advisory, Project management, Business process improvement (process and mockups)

Bonus points for:

- Any additional language (Portuguese, French, etc.)
- Having been a consultant on larger scale projects
- 3+ years of experience working with CPM/FPM/BI solutions
- Basic - Average Financial knowledge is required. Audit experience or advanced financial understanding.
